OPR report

Shaheen's names does not appear in report nor is it credited to OPR in any way.

Noref to evid hrg or scientific tests.

63-conspiracy-no discussion of whether there is evidence of a conspiracy. Only no identification of coconspirators. They hide this by going into all these the FBI did interview with being able to create this appearance in mind.

II. The Assassination Investigation from the table of contents alone is no more than and investigation of Ray, not the crime. From the content it also is this.

It says the FBI has not developed any links between Ray and anyone else, not between the crime and anyone else and not anything separate from Ray and relating to the crime.

Chronology, as on 78, no correlation with events in King's like. Ray left Atlanta for B'Ham the day of the Hoover memo and the day of the awful violence in Memphis. No correlation between this and purchase of wife, not purchased before this. It then lies about the cosmolibe. The FBI lab reports are more than enough on this point. The omit all the problems with the rifle and the scope, which was never sighted or attached more than finger-tight.

The quote sources as thought they were Ray: Ray stated he would Kill King." Curtis says this and a few others. They then eliminate those, incliding a black commissioned jail officer who said the opposite/ From this one would not know there arezany others statements of fact or opinion.

It is a prosecution case not subject to meaningful cross-examination.
